INTRODUCTION

Electronically operated and flow sensor-based,the **SMART WATER CONTROL PANEL** allows you to collect drinking water after making payments through UPI-QR, COIN & eCARD options. It controls the water output based on the price and the volume selection switch. Once the desired quantity is reached, it automatically cuts off the output through a solenoid valve.

- Elegant design, compact size.
- Plug-and-play type, user-friendly, easy to operate.
- Smart connectivity.
- Smart display shows UPI-QR and operational status.
- SS grade volume selection switch for smooth operation.
- Output for solenoid valve and booster pump.
- Flow-based operation.
- Low water level switch, emergency stop switch.
- It cannot accept payments if there is no water.

PAYMENT TYPES

UPI-QR

- Dynamic UPI-QR generated based on the selection of volume.
- Pay using any UPI Apps.
- Auto refund if water is not dispensed.

COIN

- Accept all denomination of coins.

eCARD

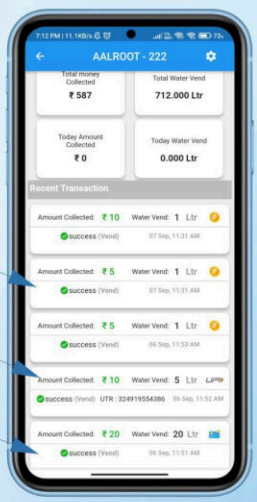

- Scan the card and recharge through any UPI app.
- No need to visit the machine for recharge.
- The balance shows when the user places the card.
- Free access is available (Special Purpose).
